Medical Technology in Berlin-Brandenburg: Networking, Communication and Promotion

© Charité – Universitätsmedizin Berlin

The Charité is Europe's largest university hospital and a prestigious partner of TSB Medici.

This project of TSB Innovationsagentur Berlin GmbH is funded by the state of Berlin and Investitionsbank Berlin (IBB) and co-financed by the European Union Regional Development Fund. Investing in your future!

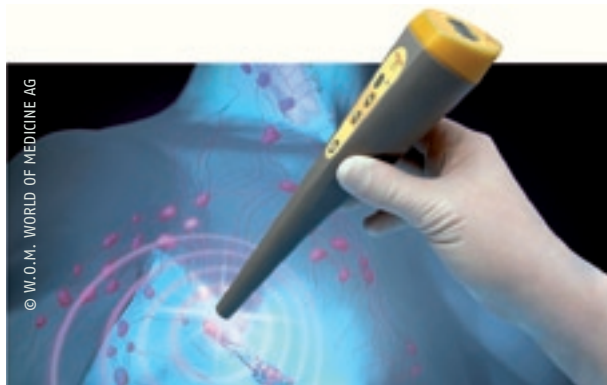

The TSB Technology Foundation Berlin

TSB Medici is part of the Technology Foundation Berlin and engaged in the continued development of medical technologies in Berlin-Brandenburg. The TSB Technology Foundation Berlin Group is a platform for technology policy dialog. It promotes the formation of competence centres in promising growth-oriented sectors. Networking in science and industry enhances the competitiveness of companies, creates jobs and increases the attractiveness of Berlin as a site of science, industry and commerce.

Berlin-Brandenburg is one of Europe's prime locations of internationally reputed universities and research facilities and a leading medicine and medical technology centre.

Examples of prestigious institutions

- Charité – Universitätsmedizin Berlin is Europe's biggest university hospital.
- The German Heart Institute Berlin (DHZB) is one of the most highly acclaimed and proficient transplantation centres worldwide.

Gamma Finder® for the Sentinel Lymph Node Biopsy.

Berlin is also home to many research facilities involved in medical technology that are highly regarded far beyond the region, including the Max-Delbrück Centre for Molecular Medicine, Laser- und Medizin-Technologie GmbH Berlin and the Physikalisch-Technische Bundesanstalt.

More than 250 research and manufacturing companies, some of whom are world market leaders in their segments, employ more than 6,000 people in the region.

The task of TSB Medici is to develop Berlin-Brandenburg into an even more vibrant and internationally recognised centre of medical technology.

State-of-the-art telecardiology: the cardiac insufficiency therapy system Lumax HF-T.

Focus activities of TSB Medici

- Competence field management for medical technology in the region Berlin-Brandenburg
- Consulting and support in the foundation of innovative companies
- Technology transfer between science and industry
- Networking between research, hospitals and production
- Dialogue forum for science and industry
- Representation of the region's medical technology nationally and internationally

The Medical Technology Masterplan

Together with partners in the field of technology promotion and in science and industry, TSB Medici is developing the Medical Technology Masterplan Berlin-Brandenburg. It formulates strategies for the continued expansion of the focus areas cardiovascular diseases, imaging, oncology and telemedicine.

The development of these fields takes place primarily by joint projects linking science and industry and in networks, including

- the corporate network Medical Technology Berlin-Brandenburg medtecnet-BB.
- Imaging Network Berlin INB
- and the Health Economy Network Berlin-Brandenburg

The Medical Technology Masterplan is one of the 12 activity areas of the Masterplan for the Health Economy in Berlin-Brandenburg, which encompasses the entire health sector in the region.

MGB – Endoscopic telescopes and complete systems for the MIC.
